Agenda

- 1) PoliTO presented the progress achieved in:
 - the finalisation of the regional model;
 - its use in the detection and spatio-temporal classification of events; (2 h)
- 2) UniTO presented the progress achieved in:
 - the analysis of the correlation between precipitation and discharge stratified as a function of catchments area and elevation;
 - the analysis of the different climate models; (2 h)
- 3) Discussion about how to proceed in order to:
 - identify events in a common way from both an hydrological and climatic point of view;
 - use the model for future scenarios; (1 h)
- 4) AOB. (N min)

Notes

- Point 3: PoliTO provided UniTO with data on discharge and events classification to allow comparison with climate data.
